

What makes our organization an N.G.O.?

At national level: To be registered as a non-profit organization / To get recognition from relevant national authorities

At international level: To obtain accreditation from U.N. and other international organizations

The accreditation process includes: Fully documented case / Passing the examination conducted by a Board of high-level professionals and politicians

Ingénieurs du Monde: VALUES & MISSIONS

Values

- To expand our philosophy of helping the least favoured countries
- To contribute to the development of lagging countries through technologies
- To promote our ethical method and approach

Missions

- To federate engineers around the world by backup or exchanges
- To re-employ, occasionally, engineers out of work
- To make engineers' voices heard in international forums
- To capitalize on our relationships and competencies
- To test and implement appropriate technologies in least developed countries
- To introduce engineers' skills into projects supported by international agencies

- Networking : International network of partners/Connection with 25 Engineer Associations
- Professional recognition: 20 years of experience/Professional awards/Publications (U.N)

Expected outcome from a sponsorship to Ingénieurs du Monde.

Ingénieurs du Monde, as an N.G.O. accredited to the U.N. system, facilitates the following:

- Demonstrating the public spirit of the sponsors
- Showing that the sponsor contributes to the world-wide effort towards economic development
- Participating in U.N. peaceful missions and programs (Kofi Annan's plea to Corporations)
- Sponsors clear and efficient involvement in a non-profit organizations' aims
- Integrating the sponsors in a network of "non-profit oriented" professionals.
